

AQUIND wants to lay and operate undersea power and data cables between France and UK. Six cables will come ashore at Portsmouth and run through the city ending at Lovedean in the South Downs. It will be like living on a building site for years. The impact will be huge! Only the government has the power to give it the green light, not local authorities, and yet it is we, the local residents who will suffer.

NO to disrupting traffic, parking and businesses
NO to threatening wildlife habitats
NO to grabbing land, property and allotments
NO to air and noise pollution
NO to **AQUIND!**
